FUEL CONSUMPTION

Fuel consumption and CO₂ figures are determined on the basis of the new WLTP test procedure as per Regulation (EU) 2017/1347. Figures shown are for comparability purposes; only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load.

Further Information

The Government have made the following changes to VED:

- Cars registered after April 1st 2018 will pay a one-off tax charge for the first year (included in OTR price), with rates decided by the CO₂ emissions of the vehicle.
- From the second year onwards, the CO₂ scale becomes irrelevant, as two flat rates will then be applied – a £0 (zero) VED rate for electric zero-emissions vehicles only, and a flat annual rate of £145 for petrol and diesel cars and £135 for alternative fuel cars.
- While cars costing over £40,000 will also be liable for the £145 VED rate from year two, they also pay an additional annual ‘supplement’ of £320 for the first five years.
